Crockett Family Farms - Crockett’s Confidential

LA Confidential X Family Secret

Crockett’s Confidential is a beautiful indica plant with typical LA Con structure. Produces large dense flowers covered in resin. Fruity smell of apricot and grape with an earthly undertone. Crockett’s Confidential is easily one of the favorites from the Crockett Family Farms collection! Expect large yields both indoors and outdoors.

Crockett Family Farms - Crockett’s Sour Tangie

Crockett's Sour Tangie is a combination of the old and the new Tangie being a newer strain people are going crazy for and Sour Diesel an old school flavour! DNA Genetics pollinated their Sour Diesel with the world famous Tangie as the pollen donor.

Sour Tangie will grow fast in the vegetate state and after flowering starts expect vertical stretching well into the 4th week. With amazing crystal production and a more amazing terpene profile, the Sour Tangie wins in all areas.

Crockett Family Farms - Crockett’s Tangie

Cali-O X Skunk

Tangie has been on the farm for over a decade, its lineage dates back to the mid 90's. Tastes and smells like the fruit!! Tangie has won over twenty awards in two years. Very reliable indoors and out. Expect big yield outdoors in mid October, and indoor 9-10 weeks.

DNA Genetics - 24K Gold

Kosher Kush x Tangie

With the scent of tangerines and the Dankness of Kosher Kush, the Kosher Tangie is like no other strain DNA has created.

Kush flavoured nugs with citrus undertones or Tangie flavour with Kosher nugs you make the choice in this F1 hybrid, expect 3 phenotypes all being winners! She will grow tall in Veg. And will stretch until the 4th week of flowering. Flowering time will be 9-10 weeks with above average yields. Expect to see some very resinous flowers with that Cup winning taste and smell!

DNA Genetics - 60 Day Lemon

With mouthwatering flavor and a super fast flowering time this strain is good for everyone, from the beginner to expert these ultra pungent fast flowering plants will have you amazed. No special light or light cycle is needed, you can even flower her in your kitchen window (Of course a proper 12/12 hour light cycle will give much better results).

60 Day Lemon is a perfect strain for the person who has always wanted to grow, but did not want to invest in a whole set up and grow room. Now all of you who never grew can get your feet wet with a crystal filled, lemon flavored gem. And those of us who have grown plenty can, and will be amazed at the ease and joy of growing this cross.

DNA Genetics - 60 Day Wonder

Williams Wonder x Ruderalis

A very special commercial indica that produces fat and resinous flowers and finishes early. It is then crossed to a ruderalis strain, back crossed a couple of times, and now we are ready to release one of the fastest commercially viable strains out on the market. 60 Day Wonder will finish in any light cycle, including 24 hours of light, 60 days from seed.

The flowers on this plant look more like the Williams Wonder and it keeps the medicinal values of her as well, but thanks to the ruderalis, we don't have to wait long for this magical medicine! Great for the beginner grower and perfect for commercial growers who want to crop every 60 days in- or outside from seed! A great strain for the windowsill or for the stealthy gardener.

DNA Genetics - Cannalope Haze

Haze Brothers x Mexican (Michoacán)

This strain is renowned for its very melon and sweet smelling buds. This translates into a very nice taste and smoothness on both the inhale and exhale. The high is heady hitting in the temples and eyes. She is a good yielder and an easy to grow plant that is a fast finisher. Mild Haze qualities with an expansive smoke and good resin production results in great water hash.

The Cannalope is a great strain to breed with because of it's low flowering time. 1st CABA Cup 2010 Buenos Aires 2nd Sativa IC420 Breederscup 2005 3rd Sativa IC420 Breederscup 2004

DNA Genetics - Cannalope Kush

Cannalope Haze x The OG#18

Being hailed as the “momma kush” in northern California this strain has the yields that all growers are looking for, with its early September/October harvest times (outdoor) you wont have to worry about the rains molding up your crops. The Cannalope Kush has the power of the OG Kush with early flowering time and the high yields of the Cannalope Haze. This is a very strong sativa, that has The OG#18 flavor and a hint of fruit that stays on your pallet on the exhale.

This unique cross went thru 3 years of test growing where we gave away over 1000 packs at our Amsterdam store before we brought it to market. The results are overwhelmingly positive and officially the Cannalope Kush is available everywhere! Expert as well as beginner growers love her, giving you great results with minimal effort. Whether your growing for production or for head stash Cannalope Kush can do it all.

DNA Genetics - Chocolope

The Chocolope, which was originally named D-Line, is a growers dream plant. She is easy to grow, produces heavy nugs, large yields and is unique. This sativa dominant plant likes to grow tall but can be trained to grow out. For this cross we choose our Original Chocolate Thai female to cross to the Cannalope male.

We then started back crossing this to achieve a shorter flower time and still retain some of the OG Choc. Thai qualities. What makes her so special is when you smoke her you taste that chocolate you’ve been missing from the 80’s. This is the ‘ONE’! Not much haze, but you don’t need it. It has been entered twice in cannabis competitions and won both times!

DNA Genetics - Chocolope Kush

Kosher Kush x Chocolope

Chocolope Kush is a combination of our multiple Cannabis cup winning Sativa; Chocolope, and our Indica dominate Hybrid; Kosher Kush. The Kosher Kush has won first place in every Cannabis event it has been entered in, and has been hailed as the strongest of all OG Kush crosses, finishing 7th overall in the strongest strains in the world, published by High Times magazine 2012. These two crosses bring you the best Sativa and Indica available in seed form and blend them in a way you can choose either more Kosher or more Chocolope.

Pinching works great with the Chocolope Kush keeping the top from stretching. Even the novice grower can expect above average results from this amazing cross. Are you a Kush freak who likes a little Chocolate?, or a Chocolope lover who wants the strength and flavor of Kush?, Either way this cross has it all! Be the first in your crew to run this instant champion Chocolope Kush. You people have been asking and we have been listening, the Chocolope Kush has arrived.

Note: Chocolope has been our top seller for some time now and we constantly struggle to keep her in stock, and we have no reason to think it will be any different with the Chocolope Kush.

DNA Genetics - Connie Chung

Connie Chung from DNA Genetics is a great feminized cross between the incredible G13 Haze and the classic L.A Confidential making it very special among other varieties in its category. You will not be disappointed. It will reward you with the characteristic highness of your Haze ancestors mixed with the incredible aroma that we love so much of the L.A Confidential.

It is quite easy to cultivate and develop a large harvest of juicy buds at a flowering time of 10 weeks maximum.
Connie Chung from DNA Genetics smokes in a very gentle but effective way that will fill the face of any smoker with a big smile.

DNA Genetics - Dj’s Gold

DJ Short Blueberry X Jew Gold Cut

DJ Short Blueberry crossed with Jew Gold Cut made this epic f1 hybrid. Expect heavy terpene filled flowers and good yields. Perfect combination of the old and the new taste; rich old school Blueberry and a piney, lemony, Kush flavour of the Jew Gold cut.

Suitable for veteran growers as well as beginners. Great resin production and above average yields make DJ’s Gold a “commercial kush variety” everyone can grow as well as being great for concentrate makers.

DNA Genetics - Exodus Kush

Exodus Cheese (UK) x OG Kush

The Exodus Kush is a cross that everyone has been asking for. Two unique flavors collide in this hybrid and the result is a Cheese growth structure (shorter and wide with heavy dense colas) and the OG Kush strength (mostly being nighttime smoke due to its very strong couchlock effect).

The Exodus Kush is great for the beginner grower giving great yields as well as being very forgiving with minor mistakes. Don’t let the short stature of her in veg. fool you. Pinching is suggested to keep from too much stretching and providing bigger yields. The flavor starts off like old school classic Cheese then quickly turns to the OG flavor. The OG Kush takes over your pallet while keeping the Cheese ever so slightly in the background. This mix makes it hard for devoted Cheese lovers as well as the OG Kush loyalists to look any farther. This is your cross!

DNA Genetics - Golden Berry

Kushberry X Jew Gold Cut

This fantastic fast growing marijuana plant with a nice stretch in flower has been obtained by crossing Kushberry as the female and Jew Gold reversed pollen that is possibly the strongest best tasting “Kush” available. Golden Berry mothers up easily, not to bushy and grows many tops making her great for making clones.

Golden Berry flowers in 9 weeks producing ultra-resinous flowers with Blueberry undertones. Crystal formation as early as the 3rd week, and if hash is what your after Golden Berry is perfect for the clear full flavoured concentrates. Large yields with excellent resin production make this a good all-around variety.

DNA Genetics - Golden Lemons

Jew Gold Cut x Lemon Skunk

Two champion strains brought together - Jew Gold Cut and Lemon Skunk. This is a F1 hybrid that promises to bring yields and terpenes with copious amounts of resin. Golden Lemons cannabis seeds take 8-9 weeks to finish with an over the top citrus old school Kush flavour. Clear concentrates can be easily made by pulling her early. This cannabis variety is a favourite for hash makers of all types due to her easily extracted crystals and overwhelming aroma! Strain suitable for all environments.

DNA Genetics - Holy Grail Kush

Kosher Kush x The OG #18

DNA presents the cannabis community with the 2 time Cannabis Cup Champion, Kosher Kush, crossed with the Multi-Champion strain, The OG #18, bringing you... The Holy Grail Kush! This cross produces large resinous buds that reek of OG #18/Kosher goodness!! New, or fairly new, carbon filters are highly recommended as the smell can be over powering! The Holy Grail is great for the beginner as well as the Master grower.

The experienced growers can take her to the limit, pushing the nutrient uptake to the very edge and being rewarded with insanely aromatic plants with the strength and yield not to be matched! The Holy Grail will demand the highest price of all the OG Kush hybrids. Several High Times staff were heard talking of how superior the Holy Grail Kush was in looks, smell and taste. Far out performing ALL other entries in 2011 HTCC to take First place with a first ever perfect score!! Now the world can try The Holy Grail Kush! 1st Hybrid HT Cannabis Cup 2011 2nd Indoor Hydro Spannabis 2012

DNA Genetics - Kushberry

This is the perfect blend of two West Coast flavors. The blueberry male from Oregon was used for his taste and vigor in combination with the fuely, lemon taste of the OG Kush from LA. The Kushberry is a shorter, stalkier plant which produces a decent yield. The exotic flavor doesn’t rival its strength; she is one of our strongest strains. She is berry good for medical use as she relieves pain and helps with sleep and eating disorders.

DNA Genetics - LA Chocolat

Chocolope X LA Confidential

LA Chocolat has made improvements to both parents in this cross, the Chocolope gains the power of the LA Confidential and the LA gains the yields of the Chocolope. LA Chocolat gives you one strong medicinal hybrid that has high calyx to leaf ratio, early flower times and buds that taste like fruity, earthy, chocolate. The flower time is 8 weeks making it commercially viable, grows great indoors or for a quick finish outdoors and because the original LA structure is small it stops the stretch from the Chocolope so there is no need to pinch or top. LA Chocolat is a good strain to relieve pain and also great appetite stimulator for cancer and chemotherapy patients.

DNA Genetics - LA Confidential

This is a great medical strain as it relieves pain and helps eliminate insomnia. For the everyday user, the high of this herb is psychedelic and energetic, with a hammer. This girl is a heavy eater. There are two real phenotypes of the Confidential and they will both finish in 45-56 days. One is a bit more hardy, but both equal in knock down drag out stone. Pre-veg’ing is advised to maximize the yield. Thinning the large fan leaves in the later part of the flower cycle will promote more light getting to the lower buds, thus increasing your yield. With an incredible smell and unique LA flavor, DNA’s LA Confidential has won many awards.

DNA Genetics - Lemon OG Kush

Lemon Skunk x The OG #18

This is the true Lemon OG Kush made from scratch using the Las Vegas Lemon Skunk cut and crossing that to the The OG #18 cut. What resulted is a good yielding high calyx to leaf ratio flower with an incredible lemony fuely taste and smell.

The Lemon OG Kush also has very good medicinal values, helping cancer patients that are going through chemo therapy, helping with appetite, as well as helping the doctor who needs to relax from a stressful day. Flowering in 8-9 weeks will give the grower the opportunity to grow multiple crops within a year. This is by far is the most Lemony of all the OG Kush crosses, and soon to become a crowd favorite. No need to pinch or top, the Lemon Kush stays short for a OG Kush variety.

DNA Genetics - Lemon Skunk

1st Outdoor Highlife Cup 2007 - This strain is a cross between two Skunks, the chosen phenotype selected for its lemon characteristics. The Lemon mother has been kept for over 20 years in Las Vegas and the father was chosen here in Holland. The male was donated by Eddie, formally the owner of one of the oldest and most prestigious seed banks in the Netherlands. This original prize male was selected and used in many breeding projects throughout the years.

The Lemon Skunk will grow tall and is a good yielder. She has great smelling buds. Her buds are light green with thick orange hairs. She has a high calyx to leaf ratio. This strain is the tastiest and sweetest if she is cut down between 50 and 56 days. We would like to thank the Lemon Man and Eddie for making this possible!

**DNA Genetics - Martian Mean Green**

The Martian Mean Green is a combination of one of DNA’s flagship strains, Sharksbreath, and the 1988, G13 Haze. It grows like an indica, having one main cola and few side branches. There are some phenotypes that finish in 9 weeks, but most finish in 10 with one very hazy smelling plant going 12 weeks. She smells like nothing else in your garden, even veteran growers agree. She’s from outer space!

DNA Genetics - Nicole Kush

Nicole x Kosher Kush

DNA Genetics has teamed up with our good friends over at Marimberos to offer the first official release from the Marimberos collective with the brand new flavour, Nicole Kush. This strain is a cross of Nicole from Marimberos and Kosher Kush from DNA Genetics. Packing a strong indica punch Nicole Kush is definitely one for the true connoisseurs. Super dense nugs with very low maintenance with frosty trichomes with blue terpenes. This special and unique plant has a long history of legendary water hash and BHO extractions.

DNA Genetics - Sour Diesel

The Sour Diesel is a good yielding, stretchy strain that produces light green, frosty, sour flowers that have a pinkish color when finishing. The Sour Diesel is best if you let it go the full 10 weeks and the taste lingers in your mouth well after the exhale. It is recommended to pinch and bend the tops as she grows because of the stretch, this will also improve yields. If height is an issue, you can still take advantage of this strain's stretch in the first 3 weeks by putting your rooted clones directly into flower for a 3-4 foot finish or 1-1.3 meter finish. The Sour D. is great for the beginner or the experienced grower because she is not too nutrient sensitive and can be worked to perfection! A favorite among favorite and well documented you can now add Sour Diesel to your garden and see what all the fuss is about. 2nd Hash HT Cannabis Cup 2010

**G.Y.O Collection - Double Alien 18**

The OG #18 x MMG x The OG #18

The Double Alien 18 is a re-worked version of one of our underrated champions Martian Kush. We took a select pheno of our Martian Kush and backcrossed her into the champion maker herself, The OG #18. Double Alien 18 takes more of the Martian flavor out of this cross and adds an incredible amount of The OG #18 flavor. The growth structure will however resemble the MMG as Double Alien 18 grows shorter than all OG #18 hybrids and finishes with a rock hard full bud of OG with just the very subtle hint of MMG only to be found on the exhale. This super strong hybrid brings our 5-year project to an end. What was once thought to finish at Martian Kush continued to become the relentless future Champion Double Alien 18! This is what makes breeding so fun!

G.Y.O Collection - Florida Gold

Florida OG X Jew Gold Cut

For the "Florida Gold", DNA Genetics took their clone only Jew Gold cut and combined her with our Florida OG Cut. They discovered that this epic cross was a 80% ratio of “keeper phenos”, and the results were amazing after severally growing seeds."

Outstanding results! DNA Genetics brings "Florida Gold" nothing more then Florida Og clone crossed to Jew Gold Cut.

G.Y.O Collection - Florida Lemons

Florida OG x Lemon Skunk

The result is the big yielding Florida OG hybrid that has an over the top lemon aroma! What was once a lower yielder in Florida OG became above average with sick almost rotten lemon smell. The concentration of the lemon terpene is amazing, as the flavor stays somehow Kush!

Fast flowering in 8 weeks max. and great resin production fast. The medicinal value is high as Florida Lemons will stimulate appetite, help sleep, as well as being strong enough for heavy pain suppression. Think clear, smell lemons with all that OG Kush flavor you’ve grown to love!

G.Y.O Collection - Florida OG

Coveted Cutting

Some call this Ocean Grown some call it Crippy and some Call it Florida OG! With great bag appeal and an odor you just cant get over, she’s the Florida OG!! An all around great variety with everything we look for, for breeding: growth, structure, vigor, taste, smell, looks, and strength.

Flowering in 9 weeks with average yields makes this a great strain for your head stash. Large Production yields can be challenging with the Florida OG but not impossible. Low yields are why there are so many Florida OG crosses. If you are after the classic or have grown an O.G. variation and only the original will do, then the Florida OG is for you!

G.Y.O Collection - R.K.S.

Afghani x Columbian x Thai

R.K.S. offers a strong smell similar to the skunk. If you like stinky and sticky green then this is the right choice for you. High calyx to leaf ratio and good yields makes the R.K.S. the perfect plant to grow indoors or out.

She will finish in the first week of October outside, and if this strain is grown inside, good carbon filtration is a must because she will stink. She's got a great old school flavor with a high that is up and very strong.

G.Y.O Collection - Sharksbreath

Great White Shark x Jamaican Lambsbread

Along with an amazing flavor and smell, she is easy to grow. The Sharksbreath is a highly potent, top-notch weed and a connoisseurs delight. Short, stout plants pack on frosty and very dense colas. Feed her heavy and provide good airflow to prevent bud rot.

This plant has been called the “cash crop” plant, yielding well above average! She is a good plant to breed with as she’s very stable and has proven herself as the mother to the Martian Mean Green! 2nd Hydro Spannabis 2009

G.Y.O Collection - White Alien

MMG x White Widow (Ingemar cut)

White Alien is a F1 hybrid cross of our Cannabis Cup Sativa Champion 2005 Martian Mean Green and the classic original White Widow. Great yields and frosty resin covered buds are easy to get from White Alien and beginners love this strain!

Large dense buds provide heavy yields and the leaf to bud ratio is so low that trimming time is shortened significantly. White Alien is a sativa dominate hybrid that can be used at night or in the evening and not keep you awake. The genetics are what they are 60% sativa and 40% indica but the effects are more like 70% indica and 30% sativa.

G.Y.O Collection - White Walker Kush

White Widow (Ingemar cut) x Skywalker

Expect to see super frosty flowers and large yields of resin that makes this the perfect plant for all growers and “extract artists”! White Walker Kush grows fast in the vegetive stage, and explodes after she is flipped into 12/12!

The Skywalker being one of our largest yielding “Kush” varieties and our Ingemar cutting of White Widow also a huge yielder make White Walker Kush an above average plant in the end weight department.

Reserva Privada - Kandy Kush

OG Kush x Train Wreck (T4)

Once again DNA Genetics brings the medicinal benefits and the great taste of the OG Kush and crossed it to classic Cali. Train Wreck strain - known for it’s good commercial yields, frostiness and lemony scents.

The sweetness of this Kush hybrid is comparable to kandy and after one hit you will keep coming back for more!! Heavy crystal production comes on after the 5th week but doesn’t stop producing! One of the most resinous plants in our catalogue. True California flavor.

Reserva Privada - Kosher Kush

Kosher Kush x Kosher Kush

It is a stinky over the top strain with an average yield making all who smoke it feel "blessed". She grows tall so pinching will help tame her as well as beef up the yields. She is easy to grow for the beginner and a challenge to master for the expert. The Kosher can handle moderate to heavy nutrients and has a great bud to leaf ratio making her easy to trim. Kosher Kush will instantly become your favourite smoke.

Reserva Privada - OG Kush

Bag seed from a Grateful Dead show (Chem Dawg)

The OG Kush, formally clone only, is now available for the masses! This amazing strain is the MOST demanded in the USA and gets the highest price across the boards! With great bag appeal and an odor you just can’t get over, she’s the OG Kush! She soon will become yours and your circle’s favorite strain! She stretches in veg but seems to fill herself out in flower.

She has smaller nugs, but super dense, so that you still get a good yield. Supercropping her while she’s growing will help maintain her height while increasing the yield! If you are into a strong medicine, you found her with the OG.

Reserva Privada - Skywalker Kush

Skywalker x Og Kush

The Skywalker tastes similar to our OG Kush, but the yield has increased a lot. The Skywalker also makes for a great concentrate plant, giving above average yields of hash as well as having a great complex flavor.

With its high THC % the Skywalker Kush will produce big dense flowers with lots of resin, flowering in 9 weeks gives you the chance to have multiple high yielding crops a year. You can super crop Skywalker or you can “top” her either way she responds great, and rewards you with exceptional herb.

Reserva Privada - Sour Diesel

(‘91 Chemdawg x Mass Super Skunk/NL) x DNL

The Sour Diesel is a good yielding, stretchy strain that produces light green, frosty, sour flowers that have a pinkish color when finishing. The Sour Diesel is best if you let it go the full 10 weeks and the taste lingers in your mouth well after the exhale. It is recommended to pinch and bend the tops as she grows because of the stretch, this will also improve yields.

If height is an issue, you can still take advantage of this strain's stretch in the first 3 weeks by putting your rooted clones directly into flower for a 3-4 foot finish or 1-1.3 meter finish.

Reserva Privada - Sour Kush

Sour Diesel x OG Kush

The Sour Kush, formally known as Headband, has a great yield, and the high is completely medical and not too over-powering. Finding a keeper mother is easy in a pack of 6 and this plant clones easily as well, rooting in 8-10 days. She grows fast in vegetive stage and spreads out wide to produce many tops and an even canopy.

Producing heavy resin early and a great aroma, our Sour Kush has bag and head appeal. She doesn’t grow as tall as Sour Diesel or as stetchy as the OG Kush and is not so picky with the nutrients. She has a fuely-soury taste and smell with a long lasting high. She is a good all day smoke that won’t knock you down like some of the heavy indicas and is a good strain for anxiety.

Reserva Privada - Sour Tangie

ECSD (East Coast Sour Diesel) X Tangie

This cross works, whatever you love more Sour or Tangie you make the call this strain gives it all! Look for 2 pheno's, one more Tangie and one more Sour D but both will finish in 9+ weeks and grow tall! Sour Tangie will grow fast in the vegetate state and after flowering starts expect vertical stretching well into the 4th week.

With amazing crystal production and a more amazing terpene profile, the Sour Tangie wins in all areas. Fast veg, big plants, solid long nugs, amazing crystal production, and the most insane smell.

Reserva Privada - Tangie

Clone Only x Crocket's Selection

The Genetics are Cali-o X Skunk Hybrid then selected to what we have now the Tangie, She grows nice and tall, with a good yield! She will continue vertical growth until the 5th week so be aware of your space. The Tangie produce very resinous flowers with an unbelievable aroma of citrus, tangerines!! Also she produces some of the best tasting concentrates!

Winning every contest she has been entered in 10 out of 10 contests in 8 months!!! Growing the Tangie outside is a must as she finishes late September early October with heavy yields and super sticky flowers. For best tasting results grow the Tangie in soil.

Reserva Privada - The OG #18

OG Kush S1

She takes on a more Sour taste then the original OG and at least a 1/3 better yield. She has the yield and fuely sour taste of the Chem Dawg with the OG-Chem power. Flowering in 9 weeks this is a keeper pheno, with rock hard buds that shine with crystals. If a more refined Sour version of the OG Kush is what your after, here it is.
