

Soma Seeds - Somango

Somango blends the multiple hybrid Jack Herer with Big Skunk Korean to form the fruitiest of all Soma's strains. Previously known by Soma #5, this complex cross was renamed for its tropical mango aroma and flavor. Somango is optimal as a multiple branch plant, since its genetics encourage long side branches and a height on the taller side. A sea of green method can still be undertaken, but branching and height will need to be controlled. Soma prefers to grow on soil indoors with fully organic nutrients, but other media will also give satisfactory results. As it matures, the leaves shade to purple and the buds become covered in a carpet of crystals that makes fine finger hash. While a moderate yielder, Somango's bud possesses sublime qualities. The fragrant and tasty Somango smoke delivers a buzz that is very uplifting and mentally stimulating in its effects. You can smoke this pot without turning into a remote control-wielding couch potato. Euphoric and alert, Somango is a good choice for shifting mental attitude and is a good companion to all of your favorite creative undertakings.
