

Philips - HPIT (metal Halogen)

The metal halogen lamps consist of a clear tube shaped outer balloon made of hard glass and a quartz tube that neutralizes. This tube is filled with a little mercury and a mixture of metal halogens under high pressure.

Metal halogen lamps must be used in combination with certain switches and detonators that are in compliance with the international IEC conditions. Appliance Assimilation lighting Qualities Meant to enhance the CO₂-assimilation for a better photosynthesis and growth of the plant.
