

Propagator

The Propagator is an extremely simple model that works superbly for mother plants, seedlings, cuttings and small plants. This Unit has 2x55w PL Fluorescent Tubes that produce almost 10,000 lumens. Comes with cool white tubes.

The 2x55 lamps ensure optimal results. Reflector: manufactured out of the best possible quality of aluminium: hammered MIRO 8, with a very clear, smooth and hard surface. All of this guarantees an improved photometric emission.
