

Ducting - sound-reducing - SonoDec

Extra strong sound-reducing ducting in all sizes. Fit perfectly with all our fittings, filters and fans. Perfect for situations where loud fan and extractor noise is unacceptable. Professional product. Lasts a lifetime!

SonoDec is a high quality, flexible-ducting system that dramatically reduces the noise output from extractor fans. SonoDec is an aluminium ducting around which is lined with another strengthened sheaf containing fibre glass which deadens and absorbs the sound of air as it passes through. SonoDuct does not silence [extractors](#) but dramatically reduces noise output instead. Use SonoDuct as you would use normal ducting. For best results use on both the input and output sides of your extractor fan. Reinforced spiraling with added pe/aluminium layers.

Aluminium interior, 25mm glass wool wadding with added exterior sealant.
