

Heater - Euromac - VK2002

This fantastic value Fan Heater is a compact and economic way of avoiding excessive cold in your grow room. Whisper quiet and standing just 26cm tall, this fixed direction fan heater features a dial thermostat for easy temperature regulation and an innovative anti freeze function to keep your grow room safe from extreme cold. With three settings (1000, 2000W and cool blow) the 2KW output of this heater will quickly heat most grow rooms and help you maintain ideal growing conditions.
