

Heater - Kelfort - KA 3000

Fast, safe and effective heat wherever it is needed. The Kelfort electric heaters are robust, safe, and reliable. The heat output of 3.3kw can be regulated.

There are no power losses since the entire current is converted into heat. Due to the low weight and compact construction, the devices can be used anywhere. All Kelfort heaters come with a built in thermostat and have a surprisingly economical power consumption.
