

Bluelab - Dosetronic

Optimise crop performance with consistent, accurate management of nutrient feeding by using the Bluelab Dosetronic – the simple solution for automatic hydroponic feeding systems.

The Bluelab Dosetronic keeps tight control of your vital nutrient solution levels automatically so you have the freedom to tend to the daily needs of your crop.

This is the ultimate answer for accurate and automatic control of EC, pH and temperature in hydroponic systems. The controller is easily programmed with the required values for [pH](#), [conductivity](#) and temperature. The dosing intervals are set according to the size of the tank and then it's ready to go. Bluelab Dosetronic® Nutrient Controller – complete kit including Peridoser.

Contents includes

- * Bluelab Dosetronic® Controller
- * Power supply
- * Temperature power in and power out cables
- * pH Probe with ATC
- * Conductivity Probe
- * Temperature Probe
- * Triple Peridoser and cable connection
- * pH and conductivity probe maintenance kit
- * Sample board
- * Fittings kit
- * Instruction manual

Attributes

Category	Control & Measure
Sub category	PH & EC control
Brand	Bluelab

Specifications

Functions	controls nutrient EC &PH
PH range	4 - 7.2
EC range	0 - 9.9 (factory calibrated)

Volts 240 / 110
Extra features auto temp compensation

Price table

Product label	Product code	Price exc.	Vat	Price inc.
complete controller	GCON1240	2.356,49 euro	21.0 %	2.851,35 euro
