

Relay boxes

Relay boxes complete with high quality relays and analogue timers to control your lamps coming on and off. Come in various sizes from 2-8 lamps. Also available with an optional socket for heating that comes on when your lights go off.

For a very nice compact unit suitable for tents and small grow spaces try the 2x600W or 400x600W + fan controller. These are new from Elf electro and incorporate a fan controller into the relay-box which saves room and alot of hassle.
