

Hanna - Lux-meter

HI 97500 Hanna portable luxmeter has been designed for simplicity of use in taking rapid light measurements.

The meter is provided with a light sensor connected by a flexible coaxial cable, which allows remote, stable and optimum position light measurements, without any interference of the operator. It is possible to choose among three measure ranges, simply acting on the RANGE key.

The HI 97500 luxmeter is housed in a rugged waterproof case for outdoor measurements without any problem. The 9V battery and the auto-off feature last about 200 hours of use.
