

Pump - DAB 180-float

The submersible pump from the NOVA series is designed mainly for automatically operated fixed applications in domestic use, draining basements and garages which are subject to flooding. It is also ideal for gardening and hobbies in general.

Continuous duty submersible induction motor. Stator fitted in an airtight stainless steel casing covered by a top body which contains the cabling, microswitch and capacitor. Rotor mounted on oversized greased sealed-for-life ball bearings to ensure silent running and long life. Built-in thermal and current overload protection and a capacitor permanently in circuit in the single-phase version.
