

Pump - DAB Jetinox 82

A real champion is recognised easily, like the DAB Jet Pump, a result of the most advanced technical developments.

The DAB JETINOX 132 M Single Phase is a Self-priming centrifugal pump with excellent suction capacity even when there are air bubbles. Particularly suitable for smallscale agriculture, gardening and wherever self- priming operation is necessary. These are the only pumps that will deliver the pressure needed for 250 + 4mm sprinklers (bato). All Gardenjet pumps come with a 2 meter connection cord with plug(type H07-RN-F), on and off switch and a handle for easy movement. **The suction set is not included and must be purchased separately.**
