

Bio Bizz - Fish Mix

Biobizz have been developing and producing soil mixtures, fertilisers and additives particularly for organic cultivation since 1992, making Biobizz the oldest and most experienced supplier of organic fertilisers in the Netherlands. Since Biobizz launched their range of products, many have tried to imitate but have never reached the same quality.

Fish-Mix has always been an outstanding fertilizer in organic growing, although it is used mainly outdoors, because it smells of fish. Fish-Mix accelerates the growth of the plants and gives them a dark green foliage. Fish-Mix makes the soil 'fatter' and stimulates its microbial activity. Strongly diluted it can be vaporized directly upon the leaves: the effect on the growing process will be spectacular. Vaporizing Fish-Mix indoors on young cuttings is particularly appropriate if you want to accelerate growth.
