

G-kit Wing 400W

The G-kit Wing 400W is made of aluminum profiles with features like UV proof, heat resistance PVC panels and light tight. All customized in the highest quality materials. It won't let smell, noise or light scape!

This is the most simple and practical way to start growing at home. It is easy to set and its configuration doesn't require significant changes in your space.

The height is 176cm, and guarantees that plants won't get burn to the light bulb. You can build it yourself in a very short time and without tools. Functions are vertically distributed as follows: electrics (lighting and ventilation) in the top, loose panels in the middle, and irrigation in the bottom. Order it and start to using it right away!

Notice:

This product will take 14-21days to arrive.
