

G-kit Combi

The Combi has 3 different compartments, each with independent lighting system and timer. The mother plant compartment and the flowering compartment (nr.3) are connected by a system of tubes. The air is drawn through these tubes into compartment 3 where the extractor fan is mounted. The fresh air is drawn in to compartment 1 through an air vent connecting compartment 1 with compartment 2. The fresh air for compartment 2 is drawn in from outside the cabinet. This way the air in compartment 1, 2 and 3 is continuously being refreshed without light shining from one compartment in to another.

1. Compartment 1 (h x w x d):120 x 78 x 35. Space to grow the mother plant, which is the genetic source of this indoor garden. Illuminated by a Prima Klima Starlightarmature with 2 x 55 Watt PL lights, perfect for the vegetative stage of plants.
2. Compartment 2 (h x w x d): 48 x 78 x 35. Place to root the clones cut (from the mother-plant) in c1. It's illuminated by 2 x TL 18 Watt. To make the ideal climatic conditions for the clones, the Combi includes a propagator. This way the clones will root quick and will be even healthier.
3. Compartment 3 (h x w x d)176 x 78 x 78. Here the rooted clones can grow and flower. This compartment is illuminated by a Sylvania Gro lux 400 Watt HPS lamp in a cooltube armature.

The cooltube can be hung almost between the plants without burning them. This allows you to grow bigger plants.

A powerful G-tools 2-speed ventilator removes the heat from the flowering compartment. The ventilator is connected to the cooltube and the cooltube to a carbon filter. The hot air is drawn away directly around the bulb and blown out clean and filtered through the cabinets ceiling.

Notice:

This product will take 14-21days to arrive.

Features:

Compartment 1 for mother plants: Starlight reflector met 2 x Philips

PL-L 865 -55W,4000K

Compartment 2 for propagation: 2 x 18W neon lights

Compartment 3 for flowering: 400W Sunmaster Dual Spectrum in cool tube reflector

Fan: G-Tools 2 speed 220-360m3 per hour

Filter: Prima Klima K2601 360m3

Timer: 2 x G-tools timer box with clock and relay.

Transformer: EuroGear Pro 400W including propagator

Warranty: 1 year on all technical components
