

Advanced Nutrients - pH Perfect - Connoisseur Bloom

This product is for real experts. Be prepared to get the greatest harvest of your life thanks to pH Perfect Connoisseur Bloom. This formula contains powerful star chelates, amino acids and exclusive flowering stimulators. The circulation of the sap multiplying the size, circumference, weight, power and taste buds will be activated. It will be the best crop you've collected.

The pH Perfect Connoisseur success is due in part to a secret ingredient (and exclusive product), which causes the plant to reach the summit of flowering earlier than normal time and also continues to flourish until harvest. Meanwhile, the pH Perfect technology will fix the pH in the optimal range each week of the flowering stage. In short, there is no better for growers elite who want to make the most of the genetic potential of the plant base.
