

Book - Cannabible - 2

This second volume of photos by renowned pot photographer Jason King is a visual treat for anyone who likes looking at quality buds. With over 150 strains chronicled in the book's 182 pages, King packs the shots onto each page, yet still manages to find room for comments on every one.

King also includes short essays on judging cannabis, organic growing and the benefits of growing, plus highlights on the global ganja scene, with sections of the book devoted to buds from Australia, California, Switzerland and Jamaica.

In one case, he shows eight different examples of the same strain, Trainwreck, grown out from cuttings from the same original plant, but grown under different conditions. The clear differences between the buds shows the malleability of marijuana, and how the grower may be a bigger influence on the final outcome than simple genetics can dictate. This book is a necessary addition to any pot-lover's bookshelf.
