

Solo pipe

SOLOPIPE is the revolutionary self-igniting smoking apparatus that combines a refillable, adjustable butane lighter with a high quality tobacco smoking pipe.

Solopipe specializes in assisting the ease of tobacco smoking for the handicapped and others inconvenienced by the need for 2 hands to enjoy their tobacco.

Main features include:

Adjustable Flame Control: Next to the mouth piece is a standard adjustable flame control. You can increase the size of the flame based on your particular needs.

Sliding Bowl Cover: The sliding bowl cover allows you to expose the chamber when you're ready to smoke. When you are done you can cover the bowl and be on your way and no tobacco will fall out into your pockets.

Refillable Gas Valve: Each SOLOPIPE has a refillable valve that uses any standard refillable butane ensuring that you can use your SOLOPIPE for many enjoyable years to come.
