

Vaporizer - Eagle Bill

This great product is designed by cannabis activist and vaporizer pioneer Eagle Bill to make vaporization available to everyone. He came up with the "shake and vape" based on ancient Egyptian methods of using hot stones to hold the temperature necessary to vaporize cannabis.

This great glass pipe is blown in a beautiful round shape. Easy to clean and durable (as long as it does not fall).

To use this vaporizing pipe:

- * Remove the screen.
- * Put your herb or marijuana in the bowl and replace the screen (grind your substance as fine as possible).
- * Heat the underside of the bowl until vapor is present. To make more vapor shake your pipe carefully.
