

Sensi Seeds - Afghani #1 ®

The plants from the fast, heavy, compact side of the cannabis family tree are named after India, and it's true that these strains are commonly grown for charas in the mountainous north of the country. However, the most perfect examples of the dark, ultra-resinous Cannabis Indica genotype are actually found hundreds of kilometres to the northwest, in the mountains of Afghanistan.

Dedicated students of Indica bloodlines often refer to these varieties as 'Afghanica' when speaking of their favourites and as 'hash plants' when talking generally of the strains found across India, Afghanistan and Pakistan. Many Indica-heads prefer their ganja without a trace of Sativa or Skunk, while some purists will only consume weed or hash that they know to be 100% Cannabis Indica

Anyone looking for a compact, fast easy-growing indoor strain capable of copious yields and almost-frightening resin production need look no further. Whether growers want uniform crops from seed or outstanding pure Indica mother plants to fill their flowering space with dynamic dark green clones, Afghani #1 has it covered.

Even first-timers find it hard not to succeed with this strain, and growers who bring out the full potential of Afghani #1 rank her among the finest original Indicas to be found anywhere.

Product characteristics

Brand	Sensi Seeds
Gender	Regular seeds
Type	Indoor
Genetics	Pure Indica
High	Heavy stoned
Flowering	40 - 50 days
Height	120 - 150 cm
Yield	400 - 500 grams per m2

Price table

Product label	Product code	Price exc.	Vat	Price inc.
10 seeds (reg)	SS2307	42,98 euro	21.0 %	52,00 euro
