

## Sensi Seeds - Maple Leaf Indica ®

A relatively new release as a seed, this fat, sticky hash-makers' plant has long been prized for its sparkling coating of resin glands and syrupy sweet citrus bouquet. Maple Leaf Indica is bred from precious, vintage Afghanica gene-stock – parent plants that have formed part of several important Sensi Seeds hybrids and which represent one of the surviving strains behind original Mazar-i-Sharif hashish.

The direct forebears of Maple Leaf Indica were brought out of Afghanistan just before the Soviet invasion and older smokers lucky enough to have visited the region in its peaceful era may find this variety to be a taste – and a blast – from the past.

Maple Leaf represents one of the finest Afghanica varieties ever seen outside the region, back-crossed to express the purity of her ancestors. This strain quickly and easily produces solid buds that drip with crystal and sugary orange-grapefruit flavours. While not the biggest-yielding Afghani in the Sensi collection, Maple Leaf Indica tops the list for resin production and has always been one of our personal favourites.

### Product characteristics

Brand	Sensi Seeds
Gender	Regular seeds
Type	Indoor
Genetics	Pure Indica
High	Medium stoned
Flowering	40 - 50 days
Height	120 - 150 cm
Yield	400 - 500 grams per m2

### Price table

Product label	Product code	Price exc.	Vat	Price inc.
10 seeds (reg)	SS2309	45,45 euro	21.0 %	55,00 euro
