

## Sensi Seeds - Big Bud ®

Big Bud has long been famous as a cannabis strain with jaw-dropping yields. Less well-known is the fact that her superior Indica pedigree has been carefully refined and steadily improved over many years.

Big Bud's early development occurred in the USA before the strain was brought to Holland in the Eighties in search of political asylum. When the War on Drugs intensified, pioneering US breeders feared losing irreplaceable ganja strains which embodied years of work, study and devotion.

Many unique and cherished genotypes were brought to the Netherlands to ensure they would not be lost forever.
