

Sensi Seeds - Silver Haze ®

The first Haze is vintage masterpiece of cannabis breeding - a harmonious blend of complementary equatorial genotypes that's widely regarded as the purest and most powerful Sativa ever created. Sensi's award-winning Silver Haze distills the sunny cerebral magic of her towering parent into a manageable strain with great indoor potential

Haze started out as a multiple-Sativa hybrid with roots in Central America, South India and Thailand. Developed in the days before indoor growing and cultivated below 30°N, her breeders were not restricted by factors like height, yield or short summers. As indoor growing gained popularity in the Eighties, true Haze began to disappear.
