

Sensi Seeds - Ed Rosenthal Superbud ®

The layering of Indica and Sativa qualities in this hybrid is a rare accomplishment. A superb balance of the best traits from each end of the cannabis spectrum has been achieved through expert selection over countless generations. The blend of tropical genes in Ed Rosenthal Super Bud's multi-faceted background is especially wide-ranging, representing Sativas from all around the equatorial zone - Africa, South East Asia, Central America and the Caribbean.

An amazingly succulent flower formation is ERSB's distinguishing feature. Different individuals show extra Sativa or Indica influence through subtle variations in the development and structure of their resin-soaked buds.
