

Sensi Seeds - Super Skunk ®

Taking the Skunk family back to its Afghani roots, Super Skunk adds flavour, weight and potency to the always-reliable Skunk #1. Despite being released three years after Shiva Skunk, Super Skunk qualifies as the first serious project to breed a next-level cannabis hybrid from the groundbreaking SK#1. Experimental Afghan-Skunk hybrids are featured in the very first Seed Bank catalogues and the breeding project aimed at finding the perfect Afghani genotype to match Skunk #1 goes back further still.

Throughout the Super Skunk project, Sensi breeders aimed to create a strain whose commercial potential, potency and hybrid vigour had never been seen before.
