

Sensi Seeds - Jamaican Pearl ®

A real innovation in cannabis breeding - Caribbean ganja adapted for the European climate! Jamaican Pearl is a sweetly potent outdoor Sativa whose presence will bring a taste of the South Seas to any garden and can even make the northern latitudes seem a touch more tropical.

Jamaica is home to Sativas of astounding quality and potency, selectively bred for countless generations, so it seems strange that Caribbean genotypes are relatively rare in modern breeding. The enthusiasm which greeted Marley's Collie showed Sensi Seeds that growers everywhere are keen to sample the delights of genuine sinse.
