

## Mr Nice Seed Bank - Critical haze

From the moment this combination of cult status parent plants were mentioned, a lot of curiosity and expectation was felt vibrating in the MNS camp. Critical Mass (Plant of the Year 2008 in Spain) has won almost all awards possible over the years in many countries not to mention its phenotypes have always, without failure, satisfied more growers worldwide than any other plant produced. A perfect plant for most outdoor growing areas of the world such as Spain, Australia, Italy, Canada and USA, but better still for those who are lucky enough to be inside a greenhouse for them growing this plant will be a real treat.

The time to finish the earlier phenotypes should be 8-10 weeks with some very worthwhile phenotypes going between 10- 12 weeks. Yields will depend on the style and types of grow however expect 450-650 grams per square meter indoors and substantially heavier plants in the outdoors and greenhouses. Since both parents are being used well in the medical patients/growers world already the combination will make this a plant a phenomena to all that grow her.

### Characteristics

Brand	Mr Nice seed bank
Gender	Regular seeds
Type	Outdoor ; Indoor ; Greenhouse
Genetics	Indica / Sativa
High	Clear high
Flowering	60 - 70 days
Height	120 - 150 cm
Yield	400 - 500 grams per m2

### Price table

Product label	Product code	Price exc.	Vat	Price inc.
15 seeds (reg)	SMRN1020	74,38 euro	21.0 %	90,00 euro
