

Dutch Passion - Dutch Cheese

For the creation of Dutch Cheese (60% Sativa, 40% Indica) our breeders took the best cheese genetics and crossed them with various other strains. We were looking for the ‘perfect match’, where two stable strains can be crossed to give a new variety that improves on both of the parents. The ideal genetics to improve Cheese eventually came from our “Euforia” - a potent Skunk selection and a personal favorite of some of the Dutch Passion team.

The crossbreeding with Euforia has not compromised the cheesy qualities at all. But it has given improved potency and significant yield improvements, growing to a height of 60-80cm with lots of sticky side buds that show some internodal spacing that will help prevent bud rot/mould – an important feature for a heavy-yielding variety. This strain is for indoor/greenhouse.

Product characteristics

Brand	Dutch Passion
Gender	Feminized seeds
Type	Greenhouse ; Indoor
Genetics	Indica Dominant
Flowering	60 - 70 days
Height	50 - 100 cm
Yield	400 - 500 grams per m2

Price table

Product label	Product code	Price exc.	Vat	Price inc.
5 seeds (fem)	SDUT1270	38,84 euro	21.0 %	47,00 euro
10 seeds (fem)	SDUT1271	70,25 euro	21.0 %	85,00 euro
