

## Druids Fantasy

Druids Fantasy is one of our most potent and popular psychedelic products. The active ingredient in Druids Fantasy is LSA, a compound similar to LSD, so has similar 'trippy' effects. This is the one of the strongest legal trips available! You'll experience a pleasant, euphoric high and end up gazing with childlike wonder at the world around you. The subtle visuals, swirls and trails, add to the magic of the trip to make this a truly visionary experience. LSA is sometimes tricky to extract - but we've done all the hard work for you as we've prepared a dosage in these easy to swallow capsules - so no nasty taste!

### Product characteristics

Category	Hallucinogens
Material	Chemical
Brand	Herbal highs
Effect	Trippy ; Visual
Strength	Very Strong

### Specifications

Ingredients	Ipomoea Convolvulaceae, Taurine, Gelatin (Capsule Shell), Magnesium Stearate
Dose	2 capsules will provide a noticeable change in perception, but for a stronger, fuller, drug-like experience, 6 capsules are recommended. The more capsules you take the stronger the effect, however you are very unlikely to need any more than 12.
Warnings	You can swallow with a drink or empty into a drink if you do not like swallowing capsules. Sometimes nausea can be felt if too many Druids Fantasy are taken in one go, so we recommend that you start by taking 2 capsules - then wait 30 minutes,
