

EX:1

The EX-1 experience feels very much like speed, but far more natural and cleaner.

EX-1 clever formula reduces the physical burnout that can be caused by stimulants and over-exertion, and as a result there is little or no comedown. EX-1, like most stimulants, makes most people more inclined to drink lots of beer, smoke lots of fags, stay up late, and not eat food. This can make you feel a bit rough, so remember not to go to crazy unless you want to.

Is it OK to mix them with Alcohol and other drugs?

EX-1 does not react badly with alcohol, and in fact seems to encourage drinking. But bear in mind, alcohol is a powerful sedative, so if you drink heavily it can mask the effects of stimulants such as EX-1. Effects may include: lots of extra energy, euphoria, a feeling of greater strength, a tingling sensations on the hair and skin.
