

Hawaiian Baby Woodrose Seeds

These start off with a relaxing feeling of well being where colours and shapes grow brighter, distorting your perceptions. Soon this progresses on to an insightful, illuminating and introspective trip like that of LSD. This brings a lucidity and clear-headedness in the mind which promotes deep communication with others. The main part of your trip will last about 6-8 hours, and a sense of tranquil calm may continue for some time afterwards. There's no comedown either - LSA trips promote a deep and peaceful sleep to rest your mind after the stimulating work out of your trip!

Product characteristics

Category	Hallucinogens
Material	Natural
Brand	Herbal highs
Effect	Trippy ; Visual
Strength	Very Strong

Specifications

Ingredients	Hawaiian Baby Woodrose Seeds
Dose	The active component is inside the seeds themselves, so they'll need to be crushed before you can consume them. These can be either eaten whole (you'll need to do a lot of chewing!) or extracted into a liquid to be drunk.
Warnings	This product should be used in a safe, familiar surrounding where the user feels comfortable. Do not use if you have liver problems or are pregnant. The intensity of the trip varies between individuals so always start off with a low dose.

Price table

Product label	Product code	Price exc.	Vat	Price inc.
