

Salvia Divinorum 20X

Salvia is a truly unique visionary herb and when treated with respect can reward you and guide you towards greater self-knowledge and harmony. The kind of trip you will experience depends on the strength of the extract. The number indicates how many times stronger the Salvia is than the original leaves, so x10 = ten times stronger. During the trip you may experience some of the following - uncontrollable laughter, euphoric moods, relaxation and calmness, meditative states, hallucinations, an altered reality, disorientation and multiple overlapping realities.

The intensity of your trip is proportional to the strength of the extract. For first time users we do not recommend any higher than x20 extract and do stress that the x40 and x60 extracts are very potent and a sitter is recommended. Take it easy, expand your mind and let it take you to places you may never knew existed. Use in moderation and when possible have a sitter (someone straight) with you.

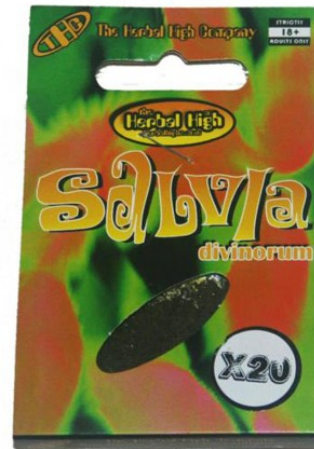

The strength of the Salvia Divinorum trip will depend on how much you take, the way you take it and your body's own chemistry. Its effects are brief and within an hour or so (usually much less) the tripper will be back to normal. It's very reassuring to hold onto this knowledge if things get messy!

When smoked the effects come on very quickly: in less than a minute and usually lasts for 2-10 minutes, depending on the strength of the extract. Salvia trips differ from those produced by other visionary drugs or herb.

Salvia has many advantages:

- * Salvia is legal
- * Salvia is not habit forming
- * Salvia is fun and bouncy
- * Effects are unlike anything you will have experienced
- * Salvia seldom produces adverse side-effects or hangover
- * You cannot take a fatal overdose of Salvia leaves

Product characteristics

Category	Hallucinogens
Material	Natural
Brand	Herbal highs
Effect	Trippy ; Visual
Strength	Out there!!

Specifications

Ingredients	Salvia Divinorum leaves
Dose	Salvia should be smoked pure, ideally in a short-stemmed tobacco pipe or a bong. Mild effects can be achieved if it is rolled but generally this is not recommended. A water-cooled smoking device (a water pipe, or bong) makes it much easier to inhale
Warnings	Do not drive on Salvia. Do not combine with drugs or alcohol. Do not use if under 18 years of age. We advise against using Salvia if you suffer from any medical condition - do not use if you suffer from a heart condition or use any MAOI medicines
