

Valerian 500mg

Valerian 500mg. Valerian is a natural sedative, perfect to help you sleep. The tranquillising action of Valerian is good for calming the nerves. The substance Valerenic acid inhibits the breakdown of GABA, a chemical transmitter in the brain, which helps to decrease activity in the nervous system. This in turn can aid the promotion of a deeper, more relaxing restful sleep.

Each tablet provides the equivalent to 500mg of whole Valerian root. Excellent for calming the nerves. • Is beneficial for those suffering anxiety and tension. • Good to aid a restful nights sleep (when taken 30-60 minutes before bedtime). • Can also have anti-spasmodic activity on muscles.
