

Bio-Bizz - All-mix

Bio-Bizz All-Mix is unlike anything you will find in a garden centre. It contains a blend of baltic peat moss, compost, worm castings, perlite and a special 'pre-mix' which is a blend of biologically active organic ingredients. The active ingredient Pre-Mix is more than just another additive - once it is blended it is then stored in a warm storehouse in the Netherlands for a 6 weeks where it is fermented into the potent mixture it is known for. Once added to All-Mix, it makes this soil a seriously effective organic growing medium that is hard to beat.

If you are going to grow in soil then this is the soil mix you want to use. Use Bio-Bizz All-Mix for growth and flowering and Bio-Bizz Light-Mix (optional) for propagating seeds and cuttings. Both grades of Bio-Bizz soil are 100% organic and provide fantastic results. We recommend that you use Bio-Bizz Nutrients in conjunction with this soil for best results.

All-Mix now available in BRAND NEW 20 Litre Bags!!
