

Southseeds - O.G Cheese

Southseeds O.G Cheese seeds were created by selecting a male O.G Kush from the entire collection of several different breeder versions of Kush. The male was then crossed with our proud mother, and the backbone of many of our breeding projects; the original Big Buddha cheese.

Its Kush and double Cheese decendance has to have one of the most recognisable smells around. Fruity, Sweet, musky skunk taste, leaves one confused yet irresistible to its pungent smell. A flowering time of 8-10 weeks, perfect for indoor and with a THC content of around the 15% mark, its high is hugely euphoric and generally quite functional.
