

Southseeds - Super Kush

Southseeds Super Kush is the product of an intensive breeding project that started in 2005 in an attempt to come up with the ultimate Kush strain. Kush varieties tend to be a bit light in yield so by crossing our Kush #1 mother with a male from our Super Skunk line we think we've fixed the problem!

Huge yields of the Kushiest Kush on the market for a very reasonable flowering time is what to expect from this strain. Choose plants that go the extra week for the best THC production.
