

Southseeds - Diesel F2

Southseeds Diesel is a pungent sativa with incredible yields. We've added some Hawaiian and Afghan indica influence to the popular, almost purely sativa Sour Diesel. This raises the hybrid's calyx quotient - Southseeds F2 Diesel becomes a colossus or airy bud formation with very few leaves. Some reports show indoor yields of up to 100 grams per pant with some extra vegging. The strain favours indoor cultivation except in tropical climates, although good yields have been reported in the semi-arid climate of Southern California.

The plant responds well to heavy cropping, which encourages it to form four or five big top colas. Southseeds F2 Diesel's few leaves are thick and wide - more palm than finger - and dark green turning more purple toward harvest. A bed or garden of these tall conifer-like ladies smells exhilarating, like a grove of ripe grapefruit. "Tart citrus" also defines their taste, a little sweeter than the mother strain's lemon tang.

Marijuana seed characteristics

Brand	Southseeds
Gender	Feminized seeds
Type	Greenhouse ; Indoor
Genetics	Sativa Dominant
High	Creative high
Flowering	60 - 70 days
Height	50 - 100 cm
Yield	500 - 600 grams per m2

Price table

Product label	Product code	Price exc.	Vat	Price inc.
3 seeds (fem)	SSOU1300	13,22 euro	21.0 %	16,00 euro
5 seeds (fem)	SSOU1301	19,83 euro	21.0 %	24,00 euro
10 seeds (fem)	SSOU1302	37,19 euro	21.0 %	45,00 euro
