

Southseeds - Northern Lights F2

Highly adapted to indoor growing, Northern Lights F2 is a satisfying yielder that can finish in just over 6 weeks. The best results are obtained from hydro culture gardens. Small sea of green plants or bigger indoor plants will both do well, but remember that yield is directly related to the amount of light and space.

A petite plant averaging between 4 and 5 feet, NL has dense, resin-rich flowers and wide-fingered indica leaves. The aroma is pungently sweet and the taste is a flavorful mixture of sweet and spicy. The high is a potent physical experience that feels comfortably lazy and relaxing.

Northern Lights' fame extends to the harvest festivals where it claimed the overall High Times Cannabis Cup win in 1990, and the Cup's award for the pure Indica category in 1988-89.
