

Southseeds - Hash Plant F2

Hash Plant derives from the famed indoor Hash Plant cutting that traveled to Holland from the Northwest U.S. in the 1980's. This hybrid was crossed to one of the three genotypes of the super Afghanis, Northern Lights #1, to produce an impressively strong indica specimen.

Named for its hashy-tasting, highly resinous buds, the Hash Plant has been known as an important building block for other hybrids for many years. Expect a short indica-type plant that averages 3-4 feet in height, with a gratifyingly quick finish, a pleasantly narcotic high, and of course, great hash-making potential.

While an indoor breed in the Dutch climate, this plant has fared well in dry latitudes such as the Mediterranean. All indoor growing methods are suitable, although most growers like the hydro culture garden method best. Hash Plant is easy to clone, offering you a simple method of multiplying your success.

Marijuana seed characteristics

Brand	Southseeds
Gender	Feminized seeds
Type	Greenhouse ; Indoor
Genetics	Pure Indica
High	Heavy stoned
Flowering	40 - 50 days
Height	50 - 100 cm
Yield	500 - 600 grams per m2

Price table

Product label	Product code	Price exc.	Vat	Price inc.
3 seeds (fem)	SSOU1350	13,22 euro	21.0 %	16,00 euro
5 seeds (fem)	SSOU1351	19,83 euro	21.0 %	24,00 euro
10 seeds (fem)	SSOU1352	37,19 euro	21.0 %	45,00 euro
