

Southseeds - Super Jack A/F

Southseeds Super Jack A/F is an easy to grow Jack Herer hybrid made by crossing Southseeds Silver Skunk with the famous Jack Herer X Ruderalis. The result is a fun and easy to grow auto-flowering that will do well in all types of growing mediums.

This variety will produce high yields of large, medium density buds swelling with pungent resin that has a light lemon pepperiness mixed with a zest of skunk and a flash of Haze. The taste is both acrid and sweet with a refined mix of spiced fruit and cool Haze. Southseeds Super Jack A/F will produce a strong cerebral buzz and has a long plateau.
