

Serious Seeds - White Russian #1 A/F

Although this autoflowering variety of White Russian is not perfect yet, the quality of the final product may surprise. A quite uniform final height of 70 to 90 cm is normal, but factors like the strength of the light a plant receives or growing in small pots can influence the height a lot.

White Russian Autoflowering #1 is not 100% uniform yet. Some plants have an open bud structure and will yield less, but most plants grow more compact and yield 10 - 20 grams or more. The more light they receive during their life, the better the end result will be.
