

THSeeds - Underdawg OG

From the original Chemdawg family, we bring you the newest feminized only strain for the back garden grower. Along side the OG Kush and the Sour D, UnderDawg OG has big frosty, Kushy buds.

It is moderately easy to grow is a perfect strain to get you some nice buds for the Winter months. If you let it veg out in big pots or the ground for 7 - 8 weeks you should get 1+ kg per plant (depending on the kind of Summer). UnderDawg OG feminized is also perfect for the indoor grower who just wants some clean kushy nugs free from the troubles that clones can bring to your room.
