

Root Pouch - 150gm/m2

Root Pouch's Charcoal range. Perfect as liners inside pots. With and without handles.

Root Pouch's award-winning technology takes discarded plastic bottles that would otherwise clog our landfills and oceans, and turns them into plant pots, vertical garden pouches and erosion control sacks. Resilient and lightweight, our two types of fabric are designed to either be non degradable or to break down over time to let plants grow big and strong. The lifespan of our fabric is up to you, depending on the fabric you choose.
