

Barneys Farm - CBD Critical Cure

Indica dominant Critical Kush X CBD Enhanced.

The fast flowering Critical Cure plant produces huge, heavy buds, and the plant needs to be well supported in the final weeks of flowering. Flowers are full of resin and have exceptionally high CBD levels. CBD (Cannabidiol) and THC share a special interdependent relationship and work together to increase one another's therapeutic benefits. Critical Cure - CBD-8%, THC-5.5%.

Flowers have an intense and earthy flavor, with a hint of sweetness.
