

## Sensi Seeds - Silver Haze #9

The first Haze ranks as a vintage masterpiece of cannabis breeding, a harmonious blend of complementary equatorial genotypes which is widely regarded as the purest and most powerful Sativa ever created. Sensi's original, award-winning Silver Haze seed strain distilled the sunny cerebral magic of her towering parent into a manageable hybrid with great indoor potential.

Now, as a result of the program to breed a reliable, rewarding and 'Hazier' feminised version of the strain, Sensi Seeds makes Silver Haze #9 available to the public for the first time!

Sensi's first Silver Haze seed-strain helped bring the psychedelic Sativa indoors; her excellent performance under lights (along with Northern Lights #5 x Haze) is one of the major reasons Haze strains are still sought-after by today's growers.

Haze is seen as a fundamental cannabis variety and has a dedicated worldwide following, and some growers now seek a strain with as many of the original Haze qualities as possible, including the unique structure of the first examples.

Silver Haze #9 is a superb feminized strain that has been back-crossed to the original Haze parent stock over several generations.

Plants are tall and productive, with fabulous resin production and long, flowing buds that fill her stem and branches. Flower-formation is open, though not 'airy' - the fat calyxes that make up each bud give a good yield even from the classic Haze structure.

As an almost-pure Sativa, Silver Haze #9 can vegetate and bloom simultaneously in a flowering light-cycle. Due to her height gain, she can be put into 12/12 very soon after germination and seedlings will have no trouble exceeding 1m when flowered at 10-15cm.

This powerful growth can also be utilised to grow full-sized plants in close proximity (due to Haze's tall, narrow tendency), or to grow impressive 'ScrOG' plants. This strain also responds well to bending, training and 'super-cropping'.

Needless to say, the most desirable aspect of the Haze family - the powerful, sensual cerebral high - has been reinforced and inbred in Sensi Silver Haze #9!

### Product characteristics

Brand	Sensi Seeds
Gender	Feminized seeds
Type	Greenhouse ; Indoor
Genetics	Sativa Dominant
Flowering	70 - 80 days
Height	150 - 175 cm
Yield	500 - 600 grams per m2
Climate	Hot

### Price table

Product label	Product code	Price exc.	Vat	Price inc.
5 seeds (fem)	SS1560503	46,28 euro	21.0 %	56,00 euro
10 seeds (fem)	SS1560003	89,26 euro	21.0 %	108,00 euro
