

Dinafem - Haze Autoflowering

Haze 2.0 Autoflowering cannabis seeds by Dinafem Seeds belong to a feminized Sativa-dominant cannabis strain obtained by crossing a Haze Auto and a Jack Herer. The aim was to create a premium-quality auto strain with the character and the distinctive traits of an original Haze.

This 3rd generation automatic Haze allows the lovers of this genetics to obtain quality crops indoors in a short period of time. It grows into a wonderful, high-yielding, fast-flowering, easy-to-grow, small/medium-sized, vigorous marijuana plant that produces resinous, compact buds. It requires a richer diet than most autos. Mould and pest resistant, Haze 2.0 Autoflowering performs well both in a small indoor space and in a continental/temperate/Mediterranean climate or in a greenhouse outdoors. It is advisable to add 1/3 of coco fibre to the soil in order to accelerate the metabolism of nutrients and to plant it in mid-May/early June to make the most of the best photoperiod and light intensity of the year. Water little and often.

The flavour and aroma of Haze 2.0 Autoflowering are pronounced, with hints of citrus, Haze, cedar and spices. The effect is powerful, cerebral and long-lasting. It is the perfect marijuana plant to have lively debates with your friends.
