

Dinafem - Critical + 2.0

Critical + 2.0 cannabis seeds by Dinafem Seeds belong to a feminized, Indica-dominant cannabis strain obtained by crossing a Critical + with a moisture-resistant phenotype. The result is a strengthened version of Critical +.

Critical + 2.0 can be cultivated by a wide range of growers in regions where cultivation tends to be difficult. It grows into an easy-to-grow, fast-flowering, hardy marijuana plant that produces high-quality, big, thick buds covered in resin. Delivering high yields without difficulty, this cannabis strain is great for commercial purposes and for all kind of growers. With the features of a winner, it is a benchmark in the cannabis world.

Critical + 2.0 is an outstanding, slender marijuana plant with large, thin, light green leaves that performs really well indoors, especially in SCROG, although you should remember to control its growth.

Outdoors it enjoys temperate climates as well as the comfort of the greenhouse. It is advisable to use anti-odour filters as the smell is very strong and could be a telltale sign at the end of flowering.

The flavour and aroma of Critical + 2.0 are pronounced, with hints of lemon, pine and spices. The effect is powerful and physical, providing a long-lasting, relaxing high. It is the perfect cannabis strain to wind down with your friends.
