

## Dinafem - Shark Shock CBD

Shark Shock CBD cannabis seeds by Dinafem Seeds belong to a feminized, Indica-dominant cannabis strain obtained by crossing a Shark Shock and a selected CBD Crew male, which has resulted in a high-quality medicinal strain aimed at those suffering from different medical conditions.

Shark Shock CBD is the result of a project carried out in close collaboration with CBD Crew. It grows into an extraordinary, fast-flowering, easy-to-grow, vigorous marijuana plant that produces compact buds covered in resin. Beginners and experienced growers alike will obtain abundant crops without difficulty. Small to medium-sized, it is perfectly suited to small indoor spaces. Outdoors it enjoys warm and dry climates as well as the protective atmosphere of a greenhouse.

Shark Shock CBD, the medicinal version of Shark Shock, is a cannabis seed that originates from the "White" family, winner of several awards in the 90's and crossed with a line containing high levels of CBD. The remarkable medicinal properties of the thick resin layer that covers the flowers live up to its ancestors. It is aimed at growers of all levels looking for well-rounded strains that boast medicinal properties. This marijuana plant is a guarantee of fast, easy, quality crops.

Shark Shock CBD has an intense, bittersweet flavour and aroma with hints of garlic. The effect is powerful and relaxing, more physical than cerebral but yet not too heavy. It is the perfect cannabis strain for unwinding and for alleviating the symptoms of anorexia, insomnia, muscle pain and depression.
