

## Kannabia - Afrodite

One of the most popular genetics among Spanish growers is Jack Herer. Its results outdoors are legendary.

A hybrid with sativa structure, flavour and effects, but after crossing it with our father Back Domina, the production is improved and flowering periods are shorten to 58-62 days. The plant has an excellent calyx-to-leaf ratio and from the first few weeks of flowering becomes covered with a thick and abundant coat of resin. The smell given off by the stems when rubbed is particularly striking. Outdoors the plant will reach 2 m high, although this is made up with its lateral growth. By topping you can achieve a large number of strong branches and hundreds of cuttings. You can increase the EC gradually, week by week, because the plant withstands high levels of EC turning them into compact flowers.

### Product characteristics

Brand	Kannabia
Gender	Feminized seeds
Type	Greenhouse ; Outdoor ; Indoor
Genetics	Indica Dominant
Flowering	50 - 60 days
Height	175 - 200 cm
Yield	400 - 500 grams per m2

### Price table

Product label	Product code	Price exc.	Vat	Price inc.
3 seeds (fem)	SDS-F-3-001	17,36 euro	21.0 %	21,00 euro
5 seeds (fem)	SDS-F-5-001	23,97 euro	21.0 %	29,00 euro
