

Kannabia - Power Skunk

Although the origins of Skunk can be found in America, this classic plant was originally grown in Holland and it's one of the most famous strains of marijuana known to date.

This was also the first hybrid stabilized and developed for indoor growing. Skunk refers to its incredibly strong smell (during flowering and combustion).

To stabilize and acclimatize it to our local conditions, we crossed this Skunk plant with our own Black Domina — a plant that gives it a higher yield and stabilizes the end of the flowering cycle in eight weeks. Although this is our fastest variety, some very indica-rich phenotypes may even finish and ripen fully in seven weeks.

Product characteristics

Brand	Kannabia
Gender	Feminized seeds
Type	Greenhouse ; Outdoor ; Indoor
Genetics	Indica Dominant
Flowering	50 - 60 days
Height	175 - 200 cm
Yield	400 - 500 grams per m2

Price table

Product label	Product code	Price exc.	Vat	Price inc.
3 seeds (fem)	SDS-F-3-015	17,36 euro	21.0 %	21,00 euro
5 seeds (fem)	SDS-F-5-015	23,97 euro	21.0 %	29,00 euro
